

See the bigger picture and communicate in a whole new way. With the Galaxy Note8 in your hand, bigger things are just waiting to happen.

A whole new way to communicate with the S Pen. Use the S Pen to express yourself in ways that make a difference. Draw your own emojis to show how you feel or write a message on a photo and send it as a handwritten note. Do things that matter with the S Pen.

Get crisp photos even when it's dark and it's difficult to keep your phone steady. The Galaxy Note8's dual camera comes with great low-light capabilities that you've come to expect from Galaxy phones, while the telephoto lens gives you 2x optical zoom for you to capture the near and far. Both have optical image stabilisation so you get steady shots even when zoomed in.

Whether you're downloading games or multitasking, it's fast and seamless on the Galaxy Note8.

## Specifications
